Further any change / enhancement in production capacity, process, raw materials shall have to be intimated to the board and unit holder has to apply fresh for the same.

S.No.	Products / By-product	Consented quantity
1	<u>Stone Crusher</u> Sand & Bajri	3406.09 Cft/annum
2	<u>Bitumen Concrete</u> Bitumen Mix	120000 MT/annum (As per Sch. II)

(The entrepreneur memorandum number is 0101200369 dated 15-9-2015).

3. The emissions or discharge of environmental pollutants from the stone crusher shall not exceed the relevant parameters and standards prescribed under respective schedules of the Environment (Protection) Rules, 1986 as amended from time to time.
4. The unit holder shall comply to the of National Ambient Air Quality Standards as per EP Act 1986 (refer rule 3(3B)).
5. The unit holder shall comply to the **Noise Pollution (Regulation and Control) Rules 2000 as amended** take adequate measures for control of noise from its own sources within the premises so as to maintain ambient air quality standards in respect of noise to less than 75 db(A) during day time and 70 db(A) during night time. Daytime is reckoned in between 6am to 10pm and night time is 10pm to 6am.

6. The unit holder shall comply to the water (Prevention and control of pollution) Act 1974 and comply to the following parameters
- Daily quantity of water consumption the unit shall not exceed 10 KLD.
 - The unit holder shall take adequate safe guards for the treatment of sewerage water by way of providing septic / soakage pit and its discharge shall confirm to the following standards

Parameters	Conc. in mg/l except pH
pH	6 - 9
BOD (3 DAYS 27 ⁰ c)	30
Total Suspended Solid	100

7. The unit holder has to operate and maintain a comprehensive air pollution control system at the time of operation of unit so as to achieve the quality of emissions within the limits prescribed under Environment Protection Act 1986 (EP Act).

A.	Implementation of following Pollution Control Measures:
a.	Dust containment cum suppression system for the equipment.
b.	Construction of wind breaking wall.
c.	Construction of metalled roads within the premises.
d.	Regular cleaning and wetting of the ground within the premises.
e.	Growing of a green belt (Broad leave trees in three rows) along the periphery..
B.	Quantitative standards for the SPM
a.	The suspended particulate matter contribution value at a distance of 40 meters from a controlled isolated as well as from a unit located in a cluster should be less than 600 mgs/Nm ³ . The measurements are to be conducted at least twice a month for all the 12 months in a year.
C.	Additional Parameters
a.	All the dust emitting points like jaw / roller crushers , screeners / classifiers shall be properly enclosed / covered.
b.	Conveyor belts shall be proper of proper quality material instead of used tyre.
c.	Regular water spray shall be carried out at all dust emitting points and transfer points.
d.	Water spray shall be done on the boundary as per requirement.
e.	Annual health survey of the workers permanently employed by the shall be conducted.
f.	The water spray system shall be interlocked with the crushing operation.

8. The unit shall not discharge any fugitive emissions from the unit.
